AntFileConverter (Windows, MacOS, Linux)

Laurence Anthony, Ph.D.
Center for English Language Education in Science and Engineering, School of Science and
Engineering, Waseda University, 3-4-1 Okubo, Shinjuku-ku, Tokyo 169-8555, Japan

VERSION HISTORY

2.1.0
New features
1. Repackaged the application for Win, MacOS, Linux with modern installers.

2.0.3
Bug features
1. New error checks have been added to the converter engine. Also, a new "Error Status" column has been added to the output summary table.

2.0.2
A minor upgrade using the most recent PDF to text converter engine.
Bug features
1. The software is now updated to the most recent PDF to text converter engine. Also, some settings have been changed to deal with a wider variety of PDF oddities.
2. Fixed a small bug that prevented the software from launching on MacOS Big Sur.

2.0.1
A minor upgrade to adopt a more modern packaging system.
Bug features
1. Not strictly a bug fix, but on Windows, the application now comes as an installer or portable app. On MacOS, the application now comes as a dmg package. On Linux, the application now comes as a compressed .tar.gz file.

2.0.0
A major upgrade to update the interface and update the install procedure for Mac.
New features
1. The app interface is now updated for a slightly more modern look.
2. The build process to compile the app for Mac OS has been updated. Now the application is released as a pkg file that can be installed into a normal location (e.g., the Applications folder). The app is also digitally signed and notarized by Apple so fewer security errors will appear.

1.2.1
A minor upgrade correcting a single bug.
Bug fixes
    1. A bug that caused copying of the results table contents to only include a single cell has been fixed.

1.2.0
New features
1. Now released for Macintosh OS X
2. Now Microsoft Word (.docx) files can also be converted to plain text.
3. Converted text files are now stored in a "txt" subfolder below the main folder when the target files are stored.

1.1.0
New features
1. Embedded this help file into the menu help
2. Added checks for protected PDF files. Protected files are skipped with a 'Failed' report. Successfully converted files are reported as 'Created'.

1.0.0
This is the first version of the program
